Learning from each other

It has been delightful to observe children playing with the new resources in our **reflection corner** this week. They have asked some many wonderful questions and have been keen to share their own thoughts, beliefs and experiences with their friends. This term in our RE lessons we are going to be exploring the theme of **Special Stories** with a particular focus on Christianity and Islam.

Homework

This week in our maths lessons we have been learning all about **2D and 3D shapes**. We have been learning their names and talking about their properties. Can you go on a shape hunt and take photographs of the shapes that you find? Post your photographs on SeeSaw for us to share together!

Did you know?

We use the vocabulary 'square rectangle' and 'oblong rectangle' with the children. This is new vocabulary so lots of practise using it at home on your shape hunt would be fantastic!

Next Week

There is going to be a mystery arrival in our unit! Keep looking at Seesaw and our website gallery to keep up with all the updates!
